

LEED INFORMATION

At Merge Design, we believe sustainability is no longer an option, it's an imperative. Merge Design Company and **extremeconcrete®** have a deep history of success with design and architecture partners on LEED-certified and eco-friendly projects throughout North America.

Due to the highly customizable characteristics of **extremeconcrete®** mix designs, Merge Design offers infinite design possibilities by melding state of the art concrete technology with proprietary forming, pouring and finishing techniques to contribute to many LEED credits including but not limited to, LEED 2009- MR 3, MR 4, and MR 5 as well as LEED v4- Innovation and Building Product Disclosure & Optimization.

extremeconcrete® material	pre-consumer content*	post-consumer content*
monochrome™	24%	9%
micro™	65%	9%
eco-X™	65%	9%
Xposed™	41%	9%
custom	up to 85%	

*dry weight of ingredients

The above recycled content information is dependent on the information we receive from our vendors. Even though every attempt has been made to keep this information current and correct, occasionally percentages of pre- and post-consumer content in a mix could vary based on product quality and availability.
